Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 1 MONTH(S) FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If the period for reply specified above is less than thirty (30) days, a reply within the statutory minimum of thirty (30) days will be considered timely.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133).
- Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

Detailed Action

This application is a 371 of PCT/EP98/06065. For applications filed under 371, PCT Rules for lack of unity apply.

This application contains the following inventions or groups of inventions, which are not so linked as to form a single general inventive concept. Under PCT Rule 13.1 the following combinations of claims of different categories are permissible and restriction to one of the following combinations is required.

In accordance with 37 CFR 1.499, applicant is required, in response to this action, to elect a single invention to which the claims must be restricted.

The Groups are as follows:

Group I: Claims 1-15, 18-26, drawn to liquid formulation comprising human interferon- β of improved shelf life.

Group II: Claims 16, 17 drawn to liquid formulation comprising human interferon- β with additional methionine, of improved shelf life.

Groups I-II are drawn to distinct polypeptides which do not share the same or a corresponding special technical feature which define the contribution of each invention. The products of Groups I and II do not share a corresponding special technical feature, because the product comprising formulations of a polypeptide of interferon- β as in Group I is different from the product comprising formulations of a polypeptide of interferon- β containing methionine as in Group II. The peptides of Group I and Group II can be used for entirely different purposes and can be generated by entirely different process steps. Therefore each of the inventions with patentably distinct uses are not related and hence a search for one would not reveal art for

another. Since these special technical features are not shared by each process, and since the common features do not establish an advance over the prior art, the inventions of Groups I-II do not form a single inventive concept within the meaning of Rule 13.2.

Applicant is advised that the response to this requirement to be complete must include an election of the invention to be examined even though the requirement be traversed.

Applicant is reminded that upon the cancellation of claims to a non-elected invention, the inventorship must be amended in compliance with 37 CFR 1.48(b) if one or more of the currently named inventors is no longer an inventor of at least one claim remaining in the application. Any amendment of inventorship must be accompanied by a petition under 37 CFR 1.48(b) and by the fee required under 37 CFR 1.17(i).
